Psychometric properties of the health literacy instrument in Brazil (HLS-EU-BR47)

Luis Saboga-Nunes^{1,2}, Uwe H. Bittlingmayer¹, Stefanie Harsch^{1*}, Silvana Ligia Vincenzi³, Silvio Aparecido da Silva⁴, Andréa Cristina Konrath³, Lizandra Brasil Estabel⁵, Eliane Lourdes da Silva Moro⁵, Luciane Alves Santini⁵, Filipe Xerxeski da Silveira⁵, Darclé Cardoso⁶, Roselita Sebold⁷, Celeste Aparecida Pereira Barbosa⁸, Marta Regina Farinelli⁹ and Dalton Francisco de Andrade³

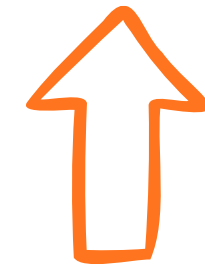

Abstract

Background Health literacy (HL) is a key component of health promotion and sustainability and contributes to well-being. Despite its global relevance, HL is an under-researched topic in South America but is now debuting its exploration in Brazil. To leverage its benefits for South America, the mere translation of validated tools into Portuguese

ESG alignment

Financial model

Assumptions

- **180 nutrition seniors/year** in Porto Alegre
- **~40% adoption**
- **~70 workshops/year** delivered
- **R\$10k fixed + R\$190/workshop** variable cost

Projected annual impact

70

nutrition students
engaged as educators

1750

students reached

R\$16

cost per student reached

Costs of inaction

As of 2026

22% of total costs are related to obesity

in the public health sector

and in the supplementary health sector

55% of total costs will be related to obesity by 2030

KEY PARTNERS

Universities in Porto Alegre

Undergraduate students in
Nutrition or Physical
Education

Secretaria Municipal de
Saúde de Porto Alegre

Private health insurance
companies

High schools and teachers

KEY ACTIVITIES

Develop BDG nutrition
workshops

Train undergraduate
students to deliver
workshops

KEY RESOURCES

BDG learning modules for
workshops

Academic partnerships
with universities

VALUE PROPOSITIONS

FOR HEALTH PROVIDERS:

Reduced long-term public
healthcare costs through
better nutrition literacy.

FOR HIGH SCHOOL TEACHERS:

Certifications by letting
undergraduates present the
workshops in class

FOR UNDERGRADUATES:

Opportunity to earn
academic credits and
teaching experience

FOR HIGH SCHOOL STUDENTS:

Nutrition education that
improves nutritional
literacy

CUSTOMER RELATIONSHIPS

Partnerships with
universities

Educational outreach to
students through
workshops

CHANNELS

In-class workshops in
high schools

University partnerships

CUSTOMER SEGMENTS

Health insurance companies

Government health
departments

Underserved high school
students

Undergraduate students
seeking academic credits

High school teachers and
schools

COST STRUCTURE

Development and maintenance of learning modules

Content updates and scientific validation

Training and coordination of undergraduate educators

Reward or incentive structures

REVENUE STREAM

Asset sale of BDG workshop modules

Corporate sponsorships

Government grants or public funding

Institutional partnerships

Inputs
Primary health
Teaching Module on how to do a workshop
Learning Module for introducing BDG (Brazilian Dietary Guidelines) for Students
University Students and professors
University and schools infrastructure

Activities	Participants
Train undergraduates for BDG workshops	Students that will undergo BDG workshops on high schools
Undergraduates will conduct BDG workshops on high schools	Universities will certify teachers that allow BDG workshops on their classes
Keep workshop digital material uptadated	

Outputs	Outcomes
Workshops delivered	Increased knowledge of healthy dietary needs (Short)
Certificates issued to high school teachers	Increased consumption of healthy food items (Medium)
Academic credits for undergraduates	Reduced cost of public health care (Long)
Prizes rewarded for students that finish the workshop	Reduced the numbers of obesity cases (Long)
Reward structure for participants	

Brazilian Dietary Guidelines

Fixed Costs

Item	Estimated Cost (R\$)	Notes
Curriculum development	R\$8,000	One-time design of curriculum aligned with the 10-step framework
Website & Digital Platform	R\$1,000	Hosting, basic site development, domain
Marketing & recruitment materials	R\$1,000	Flyers, digital promotion

Estimated Annual Fixed Costs: ~R\$10,000

Variable Costs

Item	Estimated Cost (R\$)	Notes
Workshop educational materials (handouts, worksheets)	R\$40	Printed learning materials for students
Printing curriculum materials	R\$25	Teacher guides and facilitator materials
Nutrition demonstration supplies	R\$40	Fruits, ingredients, or healthy snack examples
Workshop activity supplies	R\$30	Poster boards, markers, activity materials
Training cost allocation for undergraduate educators	R\$35	Portion of cohort training spread across workshops
Teacher recognition materials	R\$10	Certificates or small classroom recognition items

Estimated Variable Cost Per Workshop: ~R\$190

Custos e Sobrecarga no SUS

A epidemia de obesidade indica que as escolhas individuais têm pouca relevância enquanto permanecem limitadas em um cenário de mudança do sistema alimentar. Com a população exposta a cada vez mais alimentos ultraprocessados, temos um cenário agravante de custos atrelados ao cuidado e às perdas ocasionadas pelas DCNT.

Custos da obesidade chegam a R\$ 1,5 bilhão no SUS

Pesquisa da Unifesp mostrou que o SUS já chegou a gastar R\$ 1,5 bilhão com o sobrepeso no Brasil. Conheça os custos com a obesidade

 Painel Brasileiro da Obesidade / Aug 7, 2022

Beneficiário obeso custa anualmente R\$ 33 mil para o sistema de saúde suplementar no Brasil

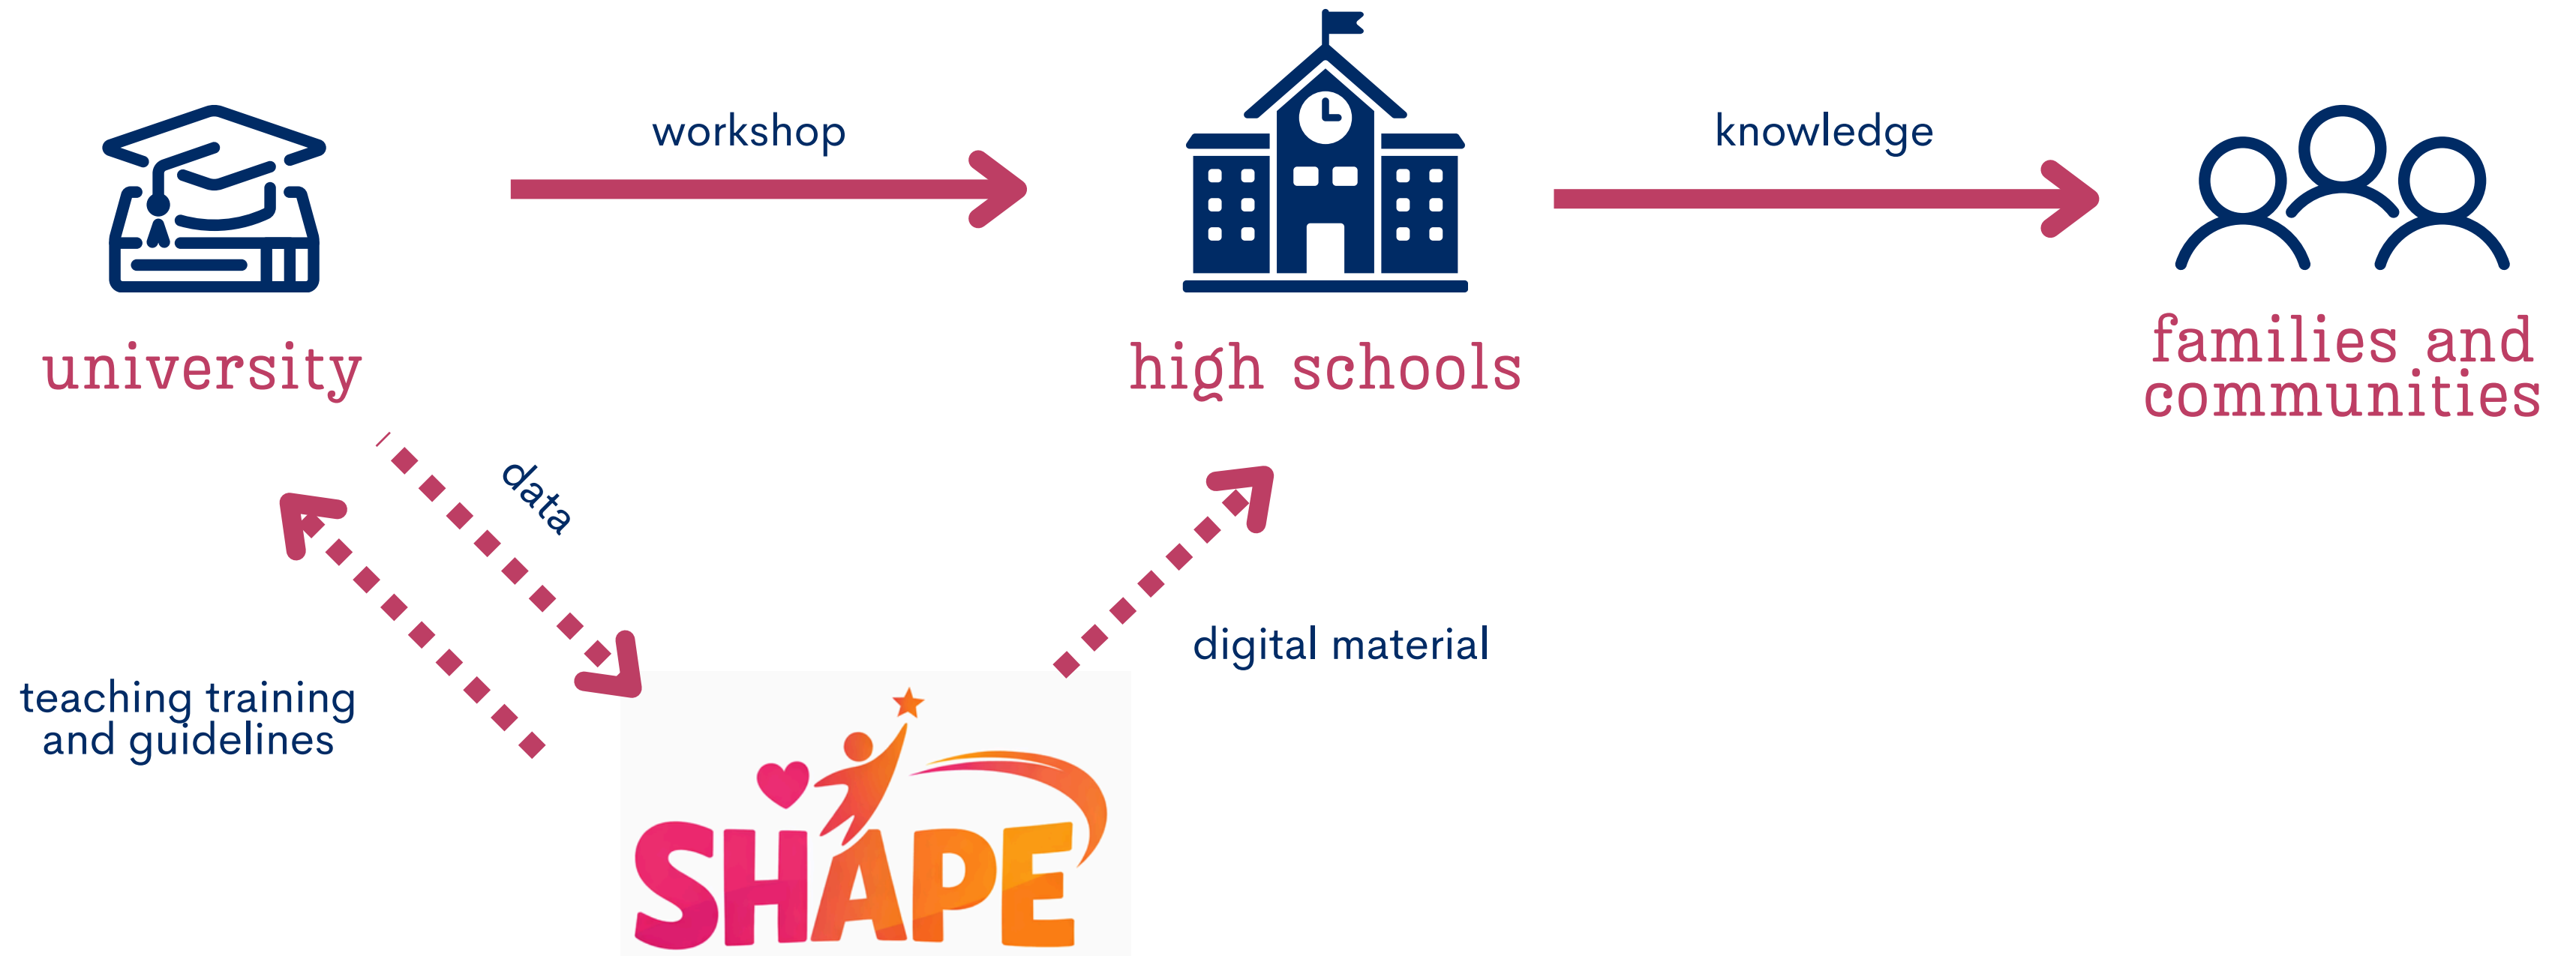

Entre as comorbidades que podem ser prevenidas com a obesidade, o diabetes tipo 2 é a doença que mais custa para o sistema

 Jornal do Comércio / Oct 3, 2022
