

Rubric

Rating Factor		Referee Name:					
Rate each factor from 1-10 (Integers only)							
1 3 5 8 10 Poor Mediocre Excellent							
	Phase in Project Lifecycle (E=Early stage / just started) (D = Research / Design Iterations) (A = Scale up / Advanced)						
1	Capture the basics of the project. (Name, Website, etc.) What is the POTENTIAL size and social / economic impact of the organization? <i>Three years from now, you aspire to be...? have xyz impact?</i>						
2	Explain the problem being addressed from a macro perspective as well as a micro (individual / family) perspective. What is your primary customer segment / target audience?						
3	What value will your venture create for all your customers / stakeholders?						
4	Discuss results of prototyping, experimentation, interviews, simulation, or modeling. Essentially, any work you have done over the week to validate your assumptions, venture, and possible solutions. (1 = no data, 10 = relevant, high-quality data)						
5	What kind of coalition will your venture build to ensure its success? How will it work within the existing system and innovate on the system to create sustainable success?						
6	What is your business / operations / sustainability model?						
7	What is your scale-up strategy? Explain with clear financial and social value projections.						
8	What is your implementation plan? What is your “go to market” strategy? Please provide a specific timeline.						
9	What does success look like for all the stakeholders? What are your metrics of success? How will you measure impact?						
10	Referee: Rate overall quality of presentation (including factors like use of technology, passion, clarity of explanation, quality of slides)
